

LEWIS Loader Attachments

Loader Mounted Hedge Trimmer	
Applications	
Improved loader usage where hedge maintenance operations are required. For use in combination with parallel lift loader.	
Options	Features
1.2m blade	Quick hitch loader mounting for easy changeover Hydraulic extendable width arm Hydraulic blade angling

Loader Mounted Carry Bucket	
Applications	
Ideal with several units distributed around sites for waste collection and distribution. Quick hitch function enables fast and efficient movement of waste or materials.	
Options	Features
1.0m width	Quick hitch function
1.3m width	Removable rear gate Easy opening, handle operated rear gate Lower wear blade

Quick Hitch Rear Weights	
Applications	
Essential to stabilize your tractor during loader operation. Quick hitch frame enables towbar to be used in conjunction with weight. Protects your tractor from excessive front axle loading.	
Options	Features
235Kgs	Quick hitch mounting mechanism as standard Standard 3-point linkage mounted Concrete filled Heavy duty metal fabricated design Painted solid black
448Kgs	
735Kgs	

Additional Loader kit options

3rd Hydraulic Function	
Applications	
3rd service for additional functionality. Used to drive 4-in-1 buckets/muck grabs etc.	
Options	Features
Add on kit possible	Operated by independent 3rd spool to allow operation of all three services independently Possible to update 2 spool loader

Shock Absorber System	
Applications	
To limit shock to the tractor whilst driving distances with load. Protects driver and equipment.	
Options	Features
25QH series	System suspension to limit shock to operator and loader Capacity matched to your loader size Add on kit possible
35/38QH series	
48QH series	

Hydraulic Quick Hitch	
Applications	
Hitch and unhitch your attachments from the comfort of your seat. No need to leave seat to change attachment.	
Options	Features
3 Spool loader only	Saves time during attachment change over Safety button operated Add on kit to current loader possible

Loader Attachments

LEWIS Loader Attachments

Standard Dirt Buckets

Applications

All types of loading applications from garden maintenance up to large scale excavations.

Multiple sizes of buckets give increased flexibility for different jobs.

Options	Features
1.0m	Heavy duty metal fabricated design
1.1m	
1.2m	Hardened metal wear blade
1.3m	Painted solid black
1.5m	
1.6m	

4-in-1 Buckets

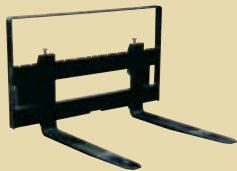

Applications

The Third hydraulic spool drives the top half of the bucket to open.

Used for grading operations, grabbing piles of dirt or lifting and carrying duties.

Greatly increases the flexibility of the loader.

Options	Features
1.2m	Heavy duty metal fabricated design
1.3m	
1.6m	Robust, long life ram construction
	Hardened metal wear blades
	Painted solid black

Pallet Forks

Applications

Used to load or unload pallets and other materials or move materials around a work area.

Options	Features
18QH series	Heavy duty metal fabricated design
25QH series and larger	
	Hardened forks
	Heavy duty metal carry frame
	Painted solid black

Muck Fork

Applications

To pick up and handle loose materials.

Used on small estates, farm and private houses for handling manure, brash and other such materials.

Options	Features
7 Tines (0.95m)	Heavy duty metal fabricated design
9 Tines (1.25m)	
	Hardened steel tines for longer life
	Painted solid black

Muck Grab

Applications

To pick up and handle loose materials.

Can move larger distances than with a muck fork without losing material.

Used on small estates, farm and private houses for handling manure, brash and other such materials.

Options	Features
7 Tines (0.95m)	Heavy duty metal fabricated design
9 Tines (1.25m)	
	Hardened steel tines for longer life
	Heavy duty purpose built ram
	Painted solid black

Multi Bucket

Applications

To pick up and handle very loose materials.

Can move larger distances than with a muck fork without losing material.

Used on small estates, farm and private houses for handling manure and other such materials.

Options	Features
0.95m	Heavy duty metal fabricated design
1.25m	
	Hardened steel blade
	Heavy duty purpose built ram
	Painted solid black

Bale Spike

Applications

Used for picking up and working with bales. Ideal for stables.

Options	Features
1.3m wide	Heavy duty metal fabricated design
	3 Hardened metal spikes
	Painted solid black

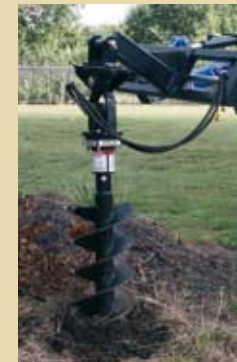

Loader Mounted Dozers

Applications

Useful for all year round scraping, grading dozing or snow plough duties.

Options	Features
1.4m	Manual angling as standard
1.6m	
1.8m	Spring loaded glide-over mechanism for improved performance
Hydraulic angling	Hydraulic lifting as standard
Rubber wearstrip	
	Height adjustable skids to prevent damage

Loader Mounted Augers

Applications

Used for boring holes in a fast and effortless manner.

Perfect for fencing or general maintenance projects where holes of up to 1.2m (4ft) depth.

Options	Features
150mm (6") diameter	Hardened steel teeth
230mm (9") diameter	
305mm (12") diameter	Uses loader's third spool
	Robust drive unit and link to loader arm
	Rotates about end of arm to ensure vertical cut.
